Subject : FAQ on IMO GHG Reduction Measures

At MEPC 83, IMO approved the mid-term GHG measures to reduce GHG emissions from international shipping. If adopted at the upcoming extraordinary session MEPC ES.2 in October, the measures are expected to enter into force in March 2027.

In response, KR has compiled a summary of the key elements of the mid-term measures, their potential economic and technical impacts on the industry, and the outlook for future discussions and response strategies. This document includes a set of Frequently Asked Questions, prepared based on inquiries we have received from our valued clients.

We hope this technical information will serve as a useful reference and assist the industry in developing effective response strategies and ensuring timely implementation.

Attachment: FAQ on IMO GHG Reduction Measures
