	Taipei		<p>5. Strict government regulations are being implemented due to the recent increase in the number of infected with the mutated virus among overseas travelers and the increase in the number of confirmed cases.</p> <p>6. Despite the ongoing border blockade where visa issuance to foreigners has been suspended since the outbreak of Corona, the number of confirmed cases of Omicron and Delta Corona is increasing.</p> <p>7. Recently, the Taiwanese government, which is promoting a zero-corona prevention policy due to the occurrence of corona infection cases of classification surveyors in Kaohsiung and Taichung ports, has announced an emergency quarantine policy for classification surveyors (Taiwan Ministry of Transport and Port Authority).</p> <p>The main policies are as follows</p> <p>1) Steps before boarding</p> <p>① Approval in advance after attaching the following 5 documents to the Taiwan Ministry of Transportation and Port Authority by e-mail: Submission of boarding application/3 days in advance PCR certificate/shipping application/prevention plan/identification card, etc.</p> <p>② Re-register the documents in paragraph ① above in the Port Authority's computer system.</p> <p>③ PCR certificate re-registered in the computer system of the quarantine authorities</p> <p>2) Steps after boarding</p> <p>① Conduct 1 PCR test and 1 diagnostic kit test for 1 week</p> <p>② Daily personal health management record</p> <p>③ Preparation of diagnostic kit management record</p> <p>④ Report the above ①~③ data by email to the quarantine authorities every day for 3 weeks</p> <p>⑤ PCR and diagnostic kit results are registered in the computer system of the quarantine authorities for 3 weeks</p> <p>** problem **</p> <ul style="list-style-type: none">- As described above, PCR test/certificate issuance (it takes at least 1.5 days) and the same repetitive task is requested three or more times for boarding, so too much time is wasted- Therefore, there is a possibility that it may be difficult to quickly carry out business and may cause customer complaints in the future.- In the case of Taiwan, despite the strong corona policy as above, the problem of corona confirmed is operated stably.
