SIRE 2.0 Programme
Inspection Process Rollout Documentation
Timetable of release

The SIRE 2.0 Programme rollout documentation consists of the following:

- *SIRE 2.0 Programme: Introduction and Guidance – Version 1.0 (January 2022)*
- *SIRE 2.0 Question Library: Part 1 – Chapters 1 to 7 – Version 1.0 (January 2022)*
- *SIRE 2.0 Question Library: Part 2 – Chapters 8 to 12 – Version 1.0 (January 2022)*
- *SIRE 2.0 Question Library: Question Programming Attributes – Version 1.0 (January 2022)*
- *SIRE 2.0 – VIQ7 Comparative Analysis – Version 1.0 (January 2022)*

These are available to download from ocimf.org/programmes/sire-2-0

When an updated version of a document is published the latest version will be available on the OCIMF website and the previous version should be considered obsolete.

SIRE 2.0 Question Library: Question Programming Attributes: This spreadsheet helps users understand how questions are assigned in the SIRE 2.0 Programme. Attributes may be adjusted over time to ensure that inspections are compiled in accordance with the objectives of the SIRE 2.0 Programme.

SIRE 2.0 – VIQ7 Comparative Analysis: In most cases, there is no direct correlation between VIQ7 and SIRE 2.0 questions. This comparative analysis spreadsheet will help a SIRE 2.0 user understand where aspects of VIQ7 questions are addressed in the SIRE 2.0 Question Library.

Information releases before SIRE 2.0 implementation

To ensure the industry is prepared for SIRE 2.0 implementation, further documentation will be released as follows:

March 2022

For vessel operators:

- *SIRE 2.0 – Instructions for completing the Pre-Inspection Questionnaire (PIQ) – Version 1.0 (March 2022)*
- *SIRE 2.0 – Instructions for uploading photographs to the Photograph Repository – Version 1.0 (March 2022)*
- *SIRE 2.0 – Instructions for uploading certificates to the Certificate Repository – Version 1.0 (March 2022)*
- *SIRE 2.0 – Instructions for requesting an inspection during the roll out and phased introduction of SIRE 2.0 – Version 1.0 (March 2022)*

Access to the PIQ, Certificate Repository and Photograph Repository will be provided to vessel operators as soon as the instructions for use are provided.

For Submitting Companies:

- *SIRE 2.0 – Instructions and Guidance for booking an inspection during the roll out and phased introduction of SIRE 2.0 – Version 1.0 (March 2022)*
- *SIRE 2.0 – Paper-Based Contingency Process – Submitting Company Instructions – Version 1.0 (March 2022)*
- *SIRE 2.0 – Inspection Resubmission Process – Submitting Company Instructions – Version 1.0 (March 2022)*

For Inspectors:

- *SIRE 2.0 – Paper-Based Contingency process – Inspector Instructions – Version 1.0 (March 2022)*
- *SIRE 2.0 – The Inspection Resubmission Process – Inspector Instructions – Version 1.0 (March 2022)*

Access to the online tools for the contingency and resubmission processes will be made available once the instructions to inspectors are published.

All documents due for release in March will be available to download from ocimf.org/programmes/sire-2-0

Impact of the introduction of HVPQ6 on SIRE 2.0

The assignment of many SIRE 2.0 questions to a compiled vessel inspection questionnaire (CVIQ) is linked to a vessel's HVPQ5.

SIRE 2.0 Question Library: Question Programming Attributes – Version 1.0, provides details of all SIRE 2.0 questions which may be assigned to a CVIQ based on a link to a vessel's HVPQ5 or PIQ.

Once HVPQ6 has been finalised for publishing, the programming within the SIRE 2.0 Question Library database will be updated to accommodate both HVPQ5 and HVPQ6 during the industry transition to HVPQ6.

SIRE 2.0 Question Library: Question Programming Attributes – Version 1.1 will be published to provide details of all SIRE 2.0 questions with links to the HVPQ5, HVPQ6 and PIQ.

SIRE 2.0 Question Library feedback portal

To ensure that all SIRE 2.0 participants can provide feedback on the ongoing accuracy of the questions within the SIRE 2.0 Question Library, a feedback portal will be provided to collect and manage comments and suggestions.

Instructions for the use of the feedback portal will be published at ocimf.org/programmes/sire-2-0 on the same date that the SIRE 2.0 Programme goes live. Please do not send in suggestions by email since feedback can only be reliably managed through the feedback portal.

SIRE 2.0 Frequently Asked Questions

OCIMF has developed a comprehensive set of SIRE 2.0 Frequently Asked Questions (FAQs) which are available at ocimf.org/programmes/sire-2-0
