

Establishment of Guidance for Ships designed to Prevent the spread of Infectious Disease

■ Summary of Major Amendments

Related Rules/Guidance	Effective date
Guidance for Ships designed to Prevent the spread of Infectious Disease	ships contracted for construction on or after 1 Sep. 2021

■ Major Amendments

○ Reason for Amendments

1. It is necessary to newly establish design and survey requirements to mitigate the spread of infectious diseases by isolating suspected and confirmed persons, and separation of shore personnel and visitors from existing crew in the event of an outbreak of an infectious disease on board.

○ Amendments

1. Establishment of layout and interior material requirements for isolation rooms and anterooms
2. Establishment of ventilation system requirements
3. Establishment of survey requirements for during construction, annual, intermediate and special.
